

## REISSUE APPLICATION DECLARATION BY THE INVENTOR

Docket Number (Optional)

9100.2881 REI

I hereby declare that:

Each inventor's residence, mailing address and citizenship are stated below next to their name.

I believe the inventors named below to be the original and first inventor(s) of the subject matter which is described and claimed in patent number 5,661,645, granted August 26, 1997 and for which a reissue patent is sought on the invention entitled POWER SUPPLY FOR LIGHT EMITTING DIODE ARRAY.

the specification of which

☐ is attached hereto.☒ was filed on August 24, 1999 as reissue application number 09/382,702

and was amended on Dec. 12, 2007, and Sept. 12, 2008  
(If applicable)

I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I acknowledge the duty to disclose information which is material to patentability as defined in 37 CFR 1.56.

☐ I hereby claim foreign priority benefits under 35 U.S.C. 119(a)-(d) or (f), or 365(b). Attached is form PTO/SB/02B (or equivalent) listing the foreign applications.

I verily believe the original patent to be wholly or partly inoperative or invalid, for the reasons described below. (Check all boxes that apply.)

☐ by reason of a defective specification or drawing.☒ by reason of the patentee claiming more or less than he had the right to claim in the patent.☐ by reason of other errors.

At least one error upon which reissue is based is described below. If the reissue is a broadening reissue, such must be stated with an explanation as to the nature of the broadening:

I believe I claimed less than I had a right to claim in my original patent. As one example, my original patent included claims 5 and 6, which depended from claim 1 and were directed to an adaptive clamp circuit means for solving leakage current problems. Independent claim 44 is an example of a claim that has been added by the present reissue application to remove limitations directed to certain power supply structure in former independent patent claim 1, while being directed to a conflict monitor compatibility circuit which, in combination with the other features recited in the claim, renders claim 44 distinct from and nonobvious over the prior art.
